Oasis Water Coolers

The PWSBF model is designed for retrofitting the bottle filler section only to existing Oasis P8AC or P8AM series models, with the exception of electric eye models. This unit is also now available to retrofit onto Elkay and Haws water coolers as well.

- **Mechanically operated**
- **Up to 8 gallons per hour**
- **Antimicrobial**
- **Lead free in materials and construction**
- **Great product for offices buildings, hospitals and schools**

Powers

Powers Thermostatic Faucet

The new TempTap thermostatic faucets automatically mix hot and cold water to deliver pre set water within a specific range. In the event of cold water failure, the thermal actuator virtually shuts off the flow of hot water. TempTap faucets are listed to ASSE 1070, IAPMO and NSF/ANSI 61 and ADA.

- Lavatory Faucet
- Gooseneck Faucet
- 0.5-2.0 GPM Options
- AdjustableTemp Limit Stop

Rheem Water Heaters

95% Thermal efficiency, sealed-combustion gas-fired commercial water heater

This line of condensing-type water heaters offers a wide range of BTU inputs, all with ultra-high thermal efficiencies from 92% to 95%. The result is a higher recovery rate particularly during periods of heavy usage.

The Spiderfire is engineered to deliver substantial amounts of hot water to meet the needs of large commercial applications, such as restaurants, office building, schools, and retail stores. The most powerful unit in the series with an input of 350,000 BTU per hour can generate 976 gallons of water per hour at a 40 degree rise. This series also has a maximum temperature of 180 degrees.

- **Corrosion resistant, high efficiency 3-pass heat exchanger**
- **Self-diagnostic LCD electronic control**
- **Zero clearance to all combustible surfaces**
- **Front and back water connections**
- **Factory installed AGA/ASME rated T&P relief valve**

American Standard

New! Selectronic FloWise DUAL FLUSH toilet flush valves

- Self-Cleaning Piston operation helps prevent clogging and reduces maintenance
- Light flush (1.1 gpf: 30% water savings) if user is in detection zone for 60 seconds or less
- Standard flush (1.6 gpf) if user is in detection zone for more than 60 seconds
- Fully mechanical Manual Override Button can flush toilet during a power outage

Available in:
11-1/2' and 27' Rough-In
Valve only for retrofit application

Models:
6065.761.002- 11-1/2 Rough
6065.762.002- 27' rough
6065.561.002- Valve only
